    ‡extended time

    ‡extra breaks

    ‡screen magnification

    ‡selectable colors

‡If other accommodations are required, test takers can request them through ETS Disability Services
https://www.ets.org/praxis/register/disabilities/

Test Security

What Security Safeguards Are In Place?

ETS is taking every precaution to ensure that test delivery and administration meet our high standards. We are employing multiple best-in-class security measures that use both real -time human monitoring and artificial intelligence technology:

‡ Live proctors will ensure constant vigilance, including confirming the test taker's identity and scanning their home environment before testing begins, flagging any suspicious activity and intervening if necessary.

‡ Artificial Intelligence technology such as facial recognition, gaze tracking and video recording of the entire session will guard against malicious activity.

How Is the Home Environment Checked?

‡Test takers are informed before testing that they must have a room that provides an acceptable environment for the test, including having a built -in camera or a separate webcam that can be moved to show the proctor a 360 -degree view of the room, including the tabletop surface.

‡Before the test begins, the test taker must use their webcam to show the room and testing space for visual 360 degree inspection.

How Is ETS Guarding Against Cheating?

‡Human proctoring takes place in real time, not after the test, and wrong -
doing can be detected by the proctor during the test session.

‡This real-time human vigilance is combined with artificial intelligence
technology to detect attempts to steal test content or cheat.

‡Examples of test taker activities that AI will flag as possible cheating
incidents include attempts to open a new browser, run unpermitted
software and use unpermitted objects such as a cell phone.

‡Notes can only be taken on white board with erasable marker or paper with
a transparent sheet protector and erasable marker, then must be erased in
view of the proctor before the test session ends.

‡The proctor can cancel the test immediately if there is any attempt to cheat.
