

This is for personal noncommercial use only.

Tax Foundation considers corporate income tax, individual income tax, sales tax, unemployment tax and property tax.

While we are all interested in protecting the environment and the ecosystem, New Jersey has a number of different agencies that must be consulted when building a project in New Jersey, especially if it is close to a sensitive area. The lack of adequate coordination among agencies in addition to the federal agencies that must also be informed, make building projects extremely difficult, time consuming and costly.

So what can be done to improve the business climate?

First, taxes must be reduced significantly. Corpora
