The timing of creating HESIG is critical, and it is an important milestone in our journey. The means by which we finance public colleges and universities will serve or deny our students nationally, and severely in need of care. Without a model, public higher education will be unable to provide broad college opportunity, especially to low- and middle-income students, and an emerging middle class. All these things are at stake. If we do not act now, we will lose the public trust – a critical element in sustaining the American college experience through education. Through HESIG, we hope to improve the student success of our members.

I look forward to working with you on this exciting and important initiative, and to hearing from you soon.

Please accept this invitation by returning the enclosed envelope.
