

General Ospreys Navigate Terminology

Ospreys Navigate

Ospreys Navigate is a FERPA-compliant student success management platform that helps coordinate student support services. The system enables faculty and staff to track, support, and provide timely interventions to promote student success.

Maxient

Maxient is a secure records management system that helps track and manage student conduct and well-being cases while complying with federal privacy laws (FERPA). It's used by Stockton Cares and other offices to maintain non-academic student records.

Care Unit

Warning! Any information you enter into the Ospreys Navigate platform pertaining to a student becomes a part of their official student record and may be subpoenaed by that

There is significant flexibility when you create availabilities. Faculty/Staff can choose the length of the availability's duration, which can range from a specific set of dates to forever. Availability can be set for appointments, drop-in visits, and/or appointment campaigns. Faculty can create course-specific availability such as course-based tutoring. For group appointments, faculty can set the maximum number of students for a single appointment slot.
