

FALL 2022

*Day of Scholarship*

Monday, November 7, 2022

PRESENTATION GUIDEBOOK

Join us for a day of Scholarship! Presentations will take place in the Campus Center Main Event Room where we can collectively gather throughout the day to attend various presentations with food and drink available for all!

## SCHEDULE OF EVENTS

8:30– 10:00	Welcome Breakfast
8:45– 9:00	Welcome Remarks– Provost Kahanov
9:00– 10:00	Poster Presentations
10:00– 12:00	Live Presentations
12:00– 12:30	Afternoon Snack and Break
12:35– 4:00	Live Presentations

Prerecorded presentations can be viewed in the BQT section of the Main

# LIVEPRESENTATIONS

Time	Presenter (s)	LIVE PRESENTATIONS	Discipline
10:05– 10:30	Miller, Richard GENS	Great Lessons for Life! Some of the greatest minds both at Stockton and outside, contributed to these amazing of lessons! Buffett, Twersky, Gates, and others have contributed the greatest lessons that helped me achieve my goals and dreams!	General
10:35– 11:00	Dobrev, Petar- BUSN	Management as a Proxy for Firm Quality The purpose of this project is to determine whether best management practices can identify higher quality firms. I find that well-managed firms are more profitable and have higher stock returns compared to poorly managed firms.	Business
11:05– 12:00	GaydaChelder, Christine SOBL Mannel, Rebecca HLTH	The Biopsychosocial Approach to Neurological Disorders Understanding neurological conditions and assisting individuals with these disorders is a complex task. The goal of this project is to apply the biopsychosocial model to neurological diseases. Clinical cases will be presented from the fields of neuropsychology and occupational therapy. This presentation is based upon a textbook currently in progress titled, "Neurological Disorders: Cases from a Biopsychosocial Perspective" by Christine GayChelder and Rebecca Mannel. Student Contributors: Madison Sauder, Luka Buncic	Health
12:00– 12:30	AFTERNOON BREAK AND SNACK		
12:35– 1:00	*Hultquist, Aleksandra GENS	Editing Part 2 of Aphra Behn's "Love Letters between a Nobleman and His Sister" (1685) Sophomore Jordan Davis has been a crucial research partner in the process of textually editing a 17th century book. This project is phase 2 of a multiyear process of updating, footnoting, and writing the introduction for the 6th edition of the first novel in the British canon (which happens to be written by a woman) for the oldest running press in the world, Cambridge University Press. Student Contributor: Jordan Davis	Literature
1:05– 2:00	*CriscioneNaylor, Noel- BUSN Aarons, Jennifer BUSN Roubos, Demetrios HT	Investigation of Work Ready Requirements and Appropriate Curriculum Pairing for Esports in Higher Education Esports has become one of the most rapidly growing, national, billion-dollar industry driven by the growing provenance of (online) games and online broadcasting technologies. Job prospects in the industry are emergent, diverse and may not be directly related to Esports. This makes it difficult to understand where esports fits in a

# POSTER PRESENTATIONS

Presenter (s)	POSTER PRESENTATIONS	Discipline
---------------	----------------------	------------

Almajid, RaniaHLTH	Virtual Reality Training in Patients with Stroke: A Critical Appraised Paper This poster presentation highlights a Critically Appraised Paper related to virtual reality training effects on stroke survivors. Student Contributor: Kerstin Maguire	Health
--------------------	---	--------

Copes, AmandaHLTH

workshop. The majority of the participants indicated an increase in awareness of DEI principles as well as application of those principles following attendance at the workshop. Note: Dr. Ana Edmonson was the keynote presenter for the-one

Science

This project focuses on a field and laboratory investigation into glauconitic soils of the NJ inner coastal plain. Physical and chemical properties related to glauconite content we examined that may impact soil use in Summer and Fall 2022. Future work will focus on trace metal and potassium content and mineralogical identification using x-ray diffraction (XRD) in Spring 2023.  
 Student Contributors: Breanna Hawkins, Dominic Arena, Zachary Ficarra

\*Ki, Daniel, NAMS

*Ki, Daniel, NAMS	Developing New Metal Halide Complexes: Design, Synthesis and Characterization for Versatile Applications This project aims to develop new metal halide based complexes using simple solution chemistry for the applications in light emitting phosphors, chemosensors, and antimicrobial activities. This research involves synthesis and characterization of metal halide complexes to understand their structural related properties using various instruments. Dr. Jennifer Martin (Stockton University) and Dr. Patrick Hillesheim (New York University) Student Contributors: Andrew Wu, Oliver Baumeyer	Science
-------------------	---	---------

\*Olson, Kory ARHU

The Routledge Handbook on the History of Paris since 1789 History  
This Handbook on the History of Paris since 1789 serves as an  
innovative piece of scholarship on the city that highlights new  
avenues of research on post-revolutionary Paris and its society.  
By telling the story of Paris in all of its complexity, we can learn  
more about France's place in the world. The goal of  
handbook will be to provide a cultural history of Paris as a  
metropolis from the Revolution, through the turbulent  
nineteenth century, the "triumphant" Third Republic, World  
Wars, decolonization, and contemporary social and cultural
